Seconds **save lives**

In Healthcare sector, there is no tolerance for any kind of faults since the human life and quality of service is critically important. In cases where human life is at risk, the seconds become obviously decisive. In addition to that, the faults which are badly affecting the service quality are putting the hospitals and health centers in a difficult position. So, the tracking of tasks, healthcare providers, assets, mothers and babies are playing a critical role in increasing the service quality in healthcare business.

More than 10 years, CALLVISION is providing the newest technology systems and solutions for healthcare sector. While CALLVISION prevents faults in service quality with its products designed with IoT and RFID technologies, it ensures timely response to emergency cases with time-critical call systems needed in emergency situations.

CALLVISION is providing "Emergency Code Systems" and "Nurse Call Systems" for call system requirements of hospitals. Also, CALLVISION is assisting to make the healthcare service more qualified and more efficient by "Asset Tracking Systems", "Staff Tracking Systems", "Mother and Newborn Tracking Systems", "Patient Tracking Systems" products. In addition to all, "Operating Room Control Panel", "Patient Isolation Informing Panel" and "IP Clock & Timer" products are satisfying the hospital needs.

## Reference Projects

**MANİSA CITY HOSPITAL**

**KAYSERİ CITY HOSPITAL**

**KONYA CITY HOSPITAL**

**TEKİRDAĞ CITY HOSPITAL**

#### ASSET TRACKING SYSTEM

CALLVISION Asset Tracking System is tracking the locations of assets like the fixtures (which are being used in diagnose, treatment or ER), moving and constant assets. The system works with wireless communication technology.

#### STAFF TRACKING SYSTEM

CALLVISION Staff Tracking System is tracking the locations of the staffs instantly. In addition to that, staff can give mobile emergency calls to the system without changing the location. The system works with wireless communication.

#### MOTHER NEWBORN TRACKING SYSTEM

CALLVISION Mother and Newborn Tracking System prevents the mixing of the babies in newborn units. Also it prevents the baby abductions from hospital. Mother-baby bracelets Works with wireless communication technology.

#### LAUNDRY TRACKING SYSTEM

CALLVISION Laundry Tracking System tracks the cleaned and uncleaned laundry Gates and the process stations in the laundry. In addition to that, it prevents the robbery.

#### PATIENT/ELDER TRACKING SYSTEM

CALLVISION Patient/Elder Tracking System is helping the people, which are in risky and sensitive health situation, by letting them start emergency call with the tracking bracelet. Also, the system tracks the instant location and movement of the patient.

#### NURSE CALL SYSTEM

CALLVISION Nurse Call System helps patients to start nurse calls from their beds, toilet-baths or emergency observation rooms. System can be either cabled or wireless.

#### EMERGENCY CODE SYSTEM

CALLVISION Emergency Code System, when an emergency call is initiated from anywhere, starts the relevant emergency at that point according to the content of the call. When the call is initiated, information is sent to the previously planned units and the hospital can intervene in the relevant event immediately.

#### MEDICAL ISOLATED POWER SYSTEM

CALLVISION Medical Isolated Power System provides an isolated power structure to qualify the hospital to the standard Group 2 - IEC 60364-7-710. Also, by the help of panels, the faults and notifications can be observed and failures can be prevented.

#### OPERATING ROOM CONTROL PANEL

CALLVISION Operating Room Control Panel provides comfortable working opportunity for the surgery team and controls the ambient conditions and surgery devices (such as medical gas, lighting control, negathoscope etc.). It has touch-screen and it contains hands-free functions.

#### EMERGENCY SERVICE CONSULTATION PANEL

The CALLVISION Emergency Service Consultation Panel allows the doctors in the emergency department to make a selection based on the branches and send calls to specialist doctors.

#### IP CLOCK & TIMER DEVICE

CALLVISION IP Clock & Timer Device displays real time information and has a stopwatch feature. The stopwatch feature provides audible and visual reminders to the staff.

#### PATIENT ISOLATION INFORMATION PANEL

CALLVISION Patient Isolation Information Panel is a system that provides detailed information about the isolation of patients. (Droplet Isolation, Respiratory Isolation, Fall Risk, Contact Isolation, Patient with Low Immune System)
